

Dr. Stephen Beckett

Research Scientist I
Computational Ecologist

School of Biological Sciences
Cherry Emerson Building
310 Ferst Drive
Georgia Institute of Technology
Atlanta GA 30332

sjbeckett@gatech.edu
<http://sjbeckett.github.io>

ORCID: 0000-0002-410-2960
updated: 15 October 2019

Research interests

Virus-microbe ecology, marine microbiology, mathematical modelling with application to biology, inference and analysis of networks.

Employment

Georgia Institute of Technology
Research Scientist I. School of Biological Sciences.
Postdoctoral Fellow. School of Biological Sciences.

August 2015 – present
February 2019 – present
August 2015 – February 2019
Atlanta, GA, USA

- Mentor: [Joshua Weitz](#).
- Evaluating viral and grazer impact on phytoplankton communities.
- Developing size-structured trait-based models of virus-host dynamics

Microsoft Research Cambridge
Research Intern. Computational Ecology and Environmental Science.

May – August 2011
Cambridge, UK

Education

University of Exeter
Ph.D. in Biological Sciences.

September 2011 – July 2015
Exeter, UK

- Thesis: **Nestedness and modularity in bipartite networks**
- Advisor: [Hywel Williams](#).

University of York
MRes. Mathematics in the Living Environment.

September 2010 – August 2011
York, UK

- Thesis: **Predicting global leaf phenology**
- Advisors: [Matthew Smith](#) (Microsoft Research) and [Jon Pitchford](#).
- Project: **Repellent pheromone laying behaviour in Pharaoh's ants** with Luke Westwood.
- Advisors: [Elva Robinson](#) and [Jon Pitchford](#).

University of Leeds
BSc (Hons). Geography & Mathematics.

September 2007 – July 2010
Leeds, UK

Honours and Awards

2018. Climate Change Fellow at Georgia Institute of Technology.
2013. Travel grant from the Society of General Microbiology to attend Autumn conference.
2011-2015. Research & Knowledge Transfer PhD studentship from the University of Exeter.
2010-2011. Partially funded masters studentship from Natural Environment Research Council.

Manuscripts in review

Benedetto B., Coenen A.R., **Beckett S.J.**, McGillicuddy Jr. D.J., Weitz J.S., Karl D.M. Sea surface height is linked to the ecological and biogeochemical state of the North Pacific Subtropical Gyre. *In review*.

Software

weighted-modularity-LPAwbPLUS: Improved community detection in weighted bipartite networks

Repository: <https://github.com/sjbeckett/weighted-modularity-LPAwbPLUS>

Description: Quantifying modularity of weighted bipartite networks as described in Beckett, 2016.

FALCON: a software package for analysis of nestedness in bipartite networks

Repository: <https://github.com/sjbeckett/FALCON>

Description: Assessing nestedness in bipartite networks, described in Beckett *et al.* 2014.

Conference Organisation

Co-convenor and moderator at *2018 Ocean Sciences Meeting* for the session: *A Matter of Life and Death: The Role of Microbial Interactions in Mediating Biogeochemical Cycles*. Co-lead with David Talmy (UTK), Kyle Mayers (SOTON) and Elizabeth Harvey (UGA). Portland, USA (2018).

Organiser for the *4th Postdoctoral Research Symposium at Georgia Tech*. Acquired \$8,500 in funds for awards to outstanding presenters, organised sessions, reviewed abstracts and coordinated the symposium. I also convened the symposium. Atlanta, USA (2017).

Presentations

Invited Talks

Computational Marine Microbiology: Linking cellular interactions to population dynamics and ecosystem function. Marine Biological Association, Plymouth (UK), June 2019.

Diel with it: Data-model comparisons of diel ecological oscillations around station ALOHA. *Simons Collaboration on Ocean Processes and Ecology Annual Meeting 2018*, Simons Foundation, NYC (USA), December 2018.

Quantifying the ecological relevance of viral lysis in complex microbial communities. Marine Biological Association & SAHFOS, Plymouth (UK), December 2017.

Estimating viral impacts on marine phytoplankton. *Microbial Dynamics seminar*, Georgia Institute of Technology, Atlanta (USA), October 2017.

Coevolved nestedness and modularity in model phage-bacteria infection networks. *Disease group seminar*, University of Exeter, Penryn Campus (UK), October 2013.

Contributed Talks

5th Postdoctoral Research Symposium at Georgia Tech: Viral Lysis vs. Grazing: Perspectives on Phytoplankton Mortality. Atlanta, GA (USA), September 2018.

Aquatic Viral Workshop 9: Viral Lysis vs. Grazing: Perspectives on Phytoplankton Mortality. Lincoln, NE (USA), June 2018.

ASLO 2017 Aquatic Sciences Meeting: Robustness and biases in estimating viral-induced plankton mortality. Honolulu, Hawai'i (USA), March 2017.

Aquatic Viral Workshop 8: Towards Modifying the Modified Dilution Method: Robustness and Biases in Estimating Viral-Induced Plankton Mortality. Plymouth (UK), July 2016.

Living systems: from interaction patterns to critical behavior: Can coevolution drive phage-bacteria network structure? San Servolo Island, Venice (Italy), September 2015.

Student Conference on Complexity Sciences: The usage of nestedness for the analysis of bipartite networks. Brighton (UK), August 2014.

Mathematical Models in Ecology and Evolution: Coevolved Nestedness and Modularity in model Phage-Bacteria Infection Networks. York (UK), August 2013.

Posters

Simons Collaboration on Ocean Processes and Ecology Annual Meeting 2018: **Beckett S.J.**, Demory D., Coenen A.R., Muratore D., Casey J., Follet C.L., Dugenne M., Wilson S.T., Follows M.J., White A.E., Ribalet F., Weitz J.S.. Diel with it: Data-model comparisons of diel ecological oscillations at Station ALOHA. NYC (USA), December 2018.

Simons Collaboration on Ocean Processes and Ecology Annual Meeting 2018: Muratore D., Armbrust E.V., Becker K., **Beckett S.J.**, Boysen A., Casey J., Chisholm S., Coenen A., Coesel S., DeLong E., Dyrman S., Follows M., Harke M., Ingalls A., Karl D., Mende D., Peng S., Ribalet F., Rodriguez R., Van Mooy B., White A., Wilson S., Zehr J., Weitz J.S. Data-Driven Discovery of Diel Dynamics Associated with Growth and Metabolism at Station ALOHA. NYC (USA), December 2018.

Simons Collaboration on Ocean Processes and Ecology Annual Meeting 2018: Carlson M., Hulata Y., Ribalet F., Baran N., Sosa O., Ferron S., Goldin S., **Beckett S.J.**, Karl, D., Weitz J., Armbrust E.V., Lindell D. Oceanic regime shifts shape viral distributions and infection of picocyanobacteria in the North Pacific Ocean. NYC (USA), December 2018.

Ocean Sciences Meeting 2018: **Beckett S.J.**, Weitz J.S. The Effect of Strain Level Diversity on Inference of Grazing and Viral-Induced Mortality. Portland, OR (USA), February 2018.

Ocean Sciences Meeting 2018: Barone B., Coenen A.R., **Beckett S.J.**, Follows M.J., Weitz J.S., Karl D.M. The impact of sea surface height variability on biogeochemical dynamics at Station ALOHA. Portland, OR (USA), February 2018.

Suddath Symposium: The Chemical Ecology of Microbiome Interactions: **Beckett S.J.**, Weitz J.S. Mortality in a bottle: nonlinear feedbacks and biases when inferring viral-induced lysis of plankton. Georgia Tech. (USA), January 2018.

Simons Collaboration on Ocean Processes and Ecology Annual Meeting 2017: Coenen A.R., Peng S., **Beckett S.J.**, Weitz J.S. Inferring virus-host interactions from abundance time-series. NYC (USA), December 2017.

Simons Collaboration on Ocean Processes and Ecology Annual Meeting 2017: **Beckett S.J.**, Weitz J.S. Mortality in a bottle: nonlinear feedbacks and biases when inferring viral-induced lysis of plankton. NYC (USA), December 2017.

Simons Collaboration on Ocean Processes and Ecology Annual Meeting 2016: **Beckett S.J.**, Lindell D., Caron D., Weitz J.S. Theoretical ecology at sea: interpreting mortality rate measurements. NYC (USA), December 2016.

Simons Collaboration on Ocean Processes and Ecology Annual Meeting 2016: Wigington C.H., Cael B.B., **Beckett S.J.**, Weitz J.S. Re-examination of the relationship between marine virus and microbial cell abundance. NYC (USA), December 2016.

NAKFI conference: Discovering the Deep Blue Sea: Research, Innovation, Social Engagement: **Beckett S.J.**, Weitz J.S. Competition, diversity and disease: implications for plankton mortality rates. Irvine, CA (USA), November 2016.

3rd Postdoctoral Research Symposium at Georgia Tech: **Beckett S.J.**, Weitz J.S. Towards Modifying the Modified Dilution Method: Robustness and Biases in Estimating Viral-induced Plankton Mortality. Atlanta, GA (USA), September 2016.

School of Biology retreat: **Beckett S.J.**, Weitz J.S. Towards Modifying the Modified Dilution Method: Robustness and Biases in Estimating Viral-induced Plankton Mortality. Helen, GA (USA), August 2016.

School of Biology retreat: Wigington C.H., Cael B.B., **Beckett S.J.**, Weitz J.S. Virus to Microbe Variability in Marine Environments. Helen, GA (USA), August 2016.

Viruses of Microbes 2016: **Beckett S.J.**, Weitz J.S. Towards Modifying the Modified Dilution Method: Robustness and Biases in Estimating Viral-induced Plankton Mortality. Liverpool (UK), July 2016.

Simons Collaboration on Ocean Processes and Ecology Annual Meeting 2015: **Beckett S.J.**, Wigington C.H., Weitz J.S. Diel or no diel? Effectiveness of the dilution method for determining host mortality rates due to viruses. NYC (USA), December 2015.

Simons Collaboration on Ocean Processes and Ecology Annual Meeting 2015: Wigington C.H., **Beckett S.J.**, Weitz J.S. Marine host-virus population dynamics with diel cycle component(s). NYC (USA), December 2015.

Uncertainty in Interaction Networks: **Beckett S.J.**, Williams H.T.P. Coevolved nestedness and modularity in phage-bacteria infection networks. Bath (UK), June 2013.

Cambridge Networks Day: **Beckett S.J.**, Williams H.T.P. Coevolved nestedness and modularity in phage-bacteria infection networks. Cambridge (UK), May 2013.

Modelling Biological Evolution 2013: Recent Progress, Current Challenges and Future Directions: **Beckett S.J.**, Williams H.T.P. Coevolved nestedness and modularity in phage-bacteria infection networks. Leicester (UK), May 2013.

Viruses of Microbes 2012: **Beckett S.J.**, Williams H.T.P. Towards trait-based models for aquatic virology. Brussels (Belgium), July 2012.

Teaching experience

Seminar: Professional development seminar focussing on the review process for the Quantitative Biosciences Graduate Program. May 2019. Georgia Institute of Technology.

Guest lecturer: 2 lectures: (1) Predator-prey dynamics and evolutionary ecology (2) Evolutionary ecology and adaptive dynamics. “*Foundations of Quantitative Biosciences*”. October/November 2018. School of Biological Sciences, Georgia Institute of Technology.

Guest lecturer: Predator-prey dynamics and evolutionary ecology. “*Special Topic: Physics of Living Systems*”. February 2018. School of Physics, Georgia Institute of Technology.

Guest lecturer: 2 lectures: (1) Predator-prey dynamics and evolutionary ecology (2) Evolutionary ecology and adaptive dynamics. “*Foundations of Quantitative Biosciences*”. October/November 2017. School of Biological Sciences, Georgia Institute of Technology.

Teaching assistant: multiple courses including “*Introduction to Ecology*” and “*Modelling for Biosciences*”. 2012-2015. Biosciences, University of Exeter.

Professional community service

Mentorship

Co-mentored with **Joshua Weitz** at the Georgia Institute of Technology:

Robert Morgan, Undergraduate Researcher in Biological Sciences (2019 –)

- Visualization of and interactive tutorials for ecological models. Supported Robert in applying for a President's Undergraduate Research Awards at Georgia Tech.

GuanLin Li, PhD candidate in Quantitative Biosciences (2018 -)

- Timeseries inference and evolutionary dynamics of virus-microbe systems.

Adam Zhang, Undergraduate Researcher in Mathematics (2017 – 2018)

- Research contributed to the manuscript: “Contrasting controls on microzooplankton grazing and viral infection of microbial prey”.
- Adam completed a Data Science Internship at UPS and is now an Analyst at Ernst&Young

Daniel Muratore, Research Intern (summer 2017)

- Microbial oceanographic modelling.

PhD candidate in Quantitative Biosciences (2017 -)

- Game theoretic models of microbial ecology and data analysis of multiple time-series.

Ashley Coenen, PhD candidate in Physics (2016 -)

- Inferring ecological community structure from population dynamics.

Charles Wigington, PhD in Bioinformatics (2016 - 2017)

- Quantifying relationships of oceanic virus-to-microbe ratios.
- Charles is now a Data Scientist at Staples.

Shengyun Peng, PhD in Bioinformatics (2015 – 2018)

- Investigating virus-host infection from single cell and genomic perspectives.
- Shengyun is now a Data Scientist with Adobe.

Memberships

- American Association for the Advancement of Science (AAAS)
- Association for the Sciences of Limnology and Oceanography (ASLO)
- Data Visualization Society
- International Society for Viruses of Microorganisms (ISVM)
- International Network of Next-Generation Ecologists (INNGE)
- National Postdoctoral Association (NPA)

Scientific peer review

Reviewer for: Nature Communications, The ISME Journal, FEMS Microbiology Ecology, Methods in Ecology and Evolution, PloS ONE, IEEE Access, Network Science, Viruses, Molecular Ecology, Journal of Biological Physics, Applied Network Science, Axios Reviews, Concurrency & Computation: Practice & Experience, Europhysics Letters, Evolutionary Bioinformatics, IEEE Transactions on Computational Social Systems.

Outreach

- Hosted the science communication twitter account @biotweeps (audience of over 18,000) for a week in [March 2019](#), where I talked about modelling and marine viruses!
- Collaboration [with Emily Madsen](#) (Georgia Tech.) and Science.Art.Wonder to promote science through art. December 2018 - April 2019. Shown at the Atlanta Science Festival and Clough Art Crawl.
- Collaboration with ceramic sculptor RJ Sturgess (Georgia State) and Science.Art.Wonder to promote science through art at the Atlanta Science Festival. December 2017 - March 2018.
- Educator supporting a massive open online course (MOOC) run by the University of Exeter and FutureLearn titled “*Climate Change: Challenges and Solutions*”. Engaged with learners online and via weekly feedback videos. 2014.
- Run “[Phage on toast](#)” where I occasionally blog about my research and research experiences. Over 1000 visitors from 64 countries. (2013 – present).

Other service

- Reviewer for President's Undergraduate Research Awards at Georgia Tech. Atlanta, USA (2019).
- Judged at the *12th Annual Undergraduate Research Spring Symposium*, Georgia Tech. Atlanta, USA (2017).
- Lead GitHub demonstrations within the Weitz group at Georgia Tech to improve and aid the production of reproducible computational science (2015, 2016).
- Helped run the Exeter Climate Change Exhibit at *Transformational Climate Science* conference. Exeter, UK (2014).
- Session chair at *Mathematical Models in Ecology and Evolution*. York, UK (2013).

Visiting researchers

Hosted David Talmy (Postdoctoral researcher at MIT) in May 2017; Sarah Hu (PhD researcher at USC) in October 2017; R.J. Sturgess (Ceramic Sculptor and graduate student at Georgia State University) in January 2018; Emily Madsen (artist and Georgia Tech. student) in December 2018.
